

Novel World Order

Nothing new under the Sun,
There is no such thing as New World Order.
Only new-born spheres made of things older.
As always, it's a Novel World Order.

History is the world's story, my son
As the storyteller think and see broader.
It's a novel of magical realism genre
And you are the author of this Novel World Order.

Since you are the novelist, plotter or authoring authority
Only to those like you history is kind.
You better always keep this in your mind
And use your Third Eye, the Defined and refined.
